CREDO
reference

Broad and rich content Credo Reference has hundreds of reference books covering every major topic, including art, medicine, history, technology, literature and more.

The Credo Reference collection features: over 3 million entries; 200,000 audio pronunciation files; 40,000+ art, science, and medical images; and 90,000 atlas images of places and geographic features throughout the world.

We are very thoughtful about what titles we add to Credo Reference. We encourage input from our customers and prospects, from librarians with expertise in particular academic subjects, from editorial experts in both the US and UK, and from our publishing partners themselves.

> PUBLISHERS

The content in Credo Reference is from some of the world's best and most respected reference publishers to ensure accuracy and reliability. The following are just some of our participating publishers:

> RELATED ENTRIES

Credo Reference enhances the content by adding millions of cross-reference links—**related entries**— that cut across topics, titles and publishers to deliver accurate, contextual results.

While traditional cross-references connect related terms within a single source, Credo Reference related entries connect results from sources **across the entire collection**, including images and sound files, enabling you to get relevant answers from a number of sources at once.
